

## SMALL GROUP SUMMER INTENSIVES

This summer, we are excited to offer specialized intensives in our Salem/Roanoke clinic.

- Sessions will span a 1 week period of time and will be reserved to 6-10 students.
- There will be three sessions for each intensive. **Session One** will run from Monday through Friday July 9-13. **Session Two** will run from Monday through Friday July 30-August 4. Specific hours will be announced after we have learned students' scheduling needs.
- Sessions are one and a half hours each day.
- Space is limited.
- Students must be able to participate in a small group without disrupting other students.
- Sessions are not prorated for vacations or student activities. A flat fee of \$195 will be charged for the entire intensive session, whether or not the student attends each day. Payment will be due by the first session.
- A nonrefundable \$60 enrollment and materials fee is required to secure a space.

### Summer Sounds

Students will tune into the sounds corresponding to letters through various regimented activities. Traditional instruction in phonological awareness will also be provided. These skills are vital for reading and spelling development. Students diagnosed with auditory processing weaknesses or those who have never learned phonics or spelling well will benefit from this foundational course.

### PHONICS INTENSIVE

Students will learn sound-symbol correspondence through a variety of well-sequenced activities. Two levels of PHONICS INTENSIVE will be available. **Level 1** is for students needing 1st through 2nd grade phonics concepts. **Level 2** tackles phonetic patterns from 3rd grade through advanced multi-syllabic words. Phonetically irregular and high frequency words will also be taught at each level.

## **STRATEGIC READING COMPREHENSION**

Students will read for different purposes and will be taught to adjust reading rate accordingly. Students will be taught critical comprehension skills and strategies for gaining meaning from text. A variety of text genres (or styles) will be utilized. **Level 1** will apply to students able to decode at a 2nd to 3rd grade level. **Level 2** will be for students who decode at the 4th or 5th grade level. **Level 3** will address comprehension for secondary aged readers.

## **SUMMER WRITING STRATEGIES**

Many students struggle to convey thoughts in writing. Students will be taught strategies for clearly expressing their thoughts on paper. **Level 1** will build word, sentence, and paragraph writing skills. **Level 2** will include single paragraph writing to multi-paragraph essays and papers.

## **MATH FACT FRENZY**

Students enrolled in this intensive will be exposed to several methods for learning and memorizing basic addition, subtraction, multiplication, and division facts.

## **ALGEBRA 1 HIGHLIGHTS**

Students enrolled in this intensive will review/practice/gain exposure to key concepts in Algebra 1. Students needing to review over the summer or get a general feel for algebra will benefit from this intensive.

## **GEOMETRY HIGHLIGHTS**

Students enrolled in this intensive will review/practice/gain exposure to key concepts in Geometry. Students needing to review over the summer or get a general feel for geometry will benefit from this intensive.

**OFF TO COLLEGE**

Students enrolled in this intensive will learn study, organizational, memory, test-taking, and time-managements skills necessary to succeed in college. Many successful high schoolers find managing their lives and study time to be quite a challenge in college. By preparing your child ahead of time, he or she will enter college knowing what to expect and can begin on the right foot.
